Felt

Cleaning Guide

Quiet by design

General Cleaning

1. Vacuum

Begin by vacuuming the Hush item. This will remove any loose dirt and dust.
(We recommend using the brushed-tipped attachment.)

2. Clean

Using soap and warm water, dampen the cloth then gently wipe the soiled area in a circular motion. Repeat as necessary.

3. Dry

Blot-dry any excess moisture with a soft dry cloth.

Sanitize and Disinfect

1. Spray

Using disinfectants or sanitizers, spray the hush item using the 'mist' setting on the spray bottle. Spray the entire surface in a uniform pattern, allowing an overlap of cleaner to ensure complete coverage. (If necessary, use a dry cloth to remove excess).

2. Dry

Allow the hush item to air-dry, there is no need to rinse out the sanitizer or disinfectant. (Unless noted on the cleaning product label).

Recommended Cleaning Products

- Water
- Soap
- Disinfectant
- Sanitizer
- Mild Bleach*

** Mild Bleach not recommended for use on Mural or custom printed Hush items*

Additional Information about Hush Acoustics' felt

- Made from PET plastic fibers. (Recycled bottles)
- 100% WaterSafe. (Can be fully submerged in water)
- Does not retain moisture, preventing mold and mildew.
