Maintenance Guide

Quiet by design

Annually

1. Clean

We recommend Hush Acoustics products to be cleaned on an annual basis. This will ensure that the full acoustic value of the product will be maintained, as well as preventing any discoloration from accumulation of airborne particles such as dust. Please refer to the 'Hush Acoustic Felt' Cleaning Guide.

2. Observe

Check wall and ceiling mounted panels to ensure that they are securely mounted in place.

Bi-annually

1. Inspect

Inspect all mounting and hanging hardware as follows:

- Ceiling suspension hardware must be securely fastened in place;
- Suspension cables should be tight;
- Clevis-hooks must have clevis engaged;
- Shoulder bracket and bolt must be tight;
- Adhered panels must be secure and unable to move;
- Track systems fastening hardware must all be tight, carriage wheels must turn freely.

Recommended Cleaning Products

- Water
- Soap
- Disinfectant
- Sanitizer
- Mild Bleach*

** Mild Bleach not recommended for use on Mural or custom printed Hush items*

Additional Information about Hush Acoustics' felt

- Made from PET plastic fibers. (Recycled bottles)
- 100% WaterSafe. (Can be fully submerged in water)
- Does not retain moisture, preventing mold and mildew.
