Install Guide
Clouds

Quiet by design

- Prior to installation, installers are advised to unpack and lay out panels to determine the most aesthetically pleasing arrangement of panels.

Shoulder-bracket

1. Place your Cloud product on a clean flat surface, with the face side down.
(Note; the top of the cloud will have small holes cut out for the installation hardware).

2. Locate the shoulder-bracket hardware provided.

3. Align the shoulder-brackets with the small cut out holes on the ribbing.

4. Now tighten the bolt hardware.

5. When all Shoulder-brackets have been installed, your cloud is now complete and ready to be suspended from the ceiling.

(Please refer to the 'Ceiling Hardware Install Guide' for the final steps).

T-track

1. Place your Cloud product on a clean flat surface, with the face side down.

2. Locate the pre-drilled holes in the metal T-track as shown below:

3. Next, attach the 'Clevis-Hook' onto the T-track in the pre-drilled holes.

(Ensure that the spring-loaded safety clip is in the closed position once the hardware is attached).

4. When all Clevis-Hooks have been installed, your Cloud is now complete and ready to be suspended from the ceiling.

(Please refer to the 'Ceiling Hardware Install Guide' for the final steps).
