Install Guide

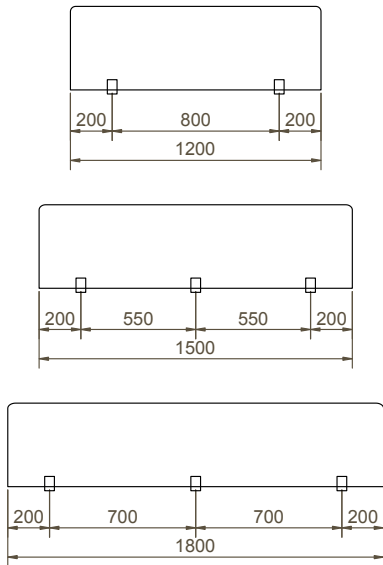

Desk Divider

Quiet by design

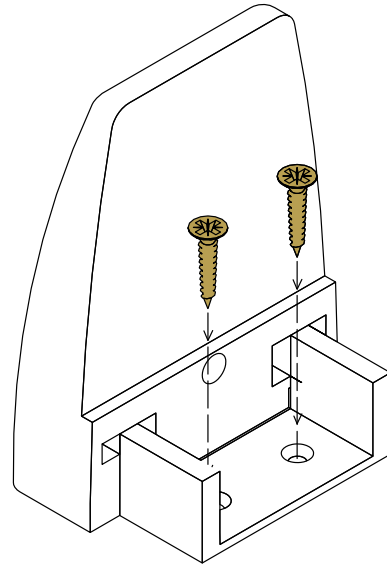

- Prior to installation, installers are advised to unpack and lay out panels to determine the most aesthetically pleasing arrangement of panels.

1. Determine the desired location for the panel on your desk.

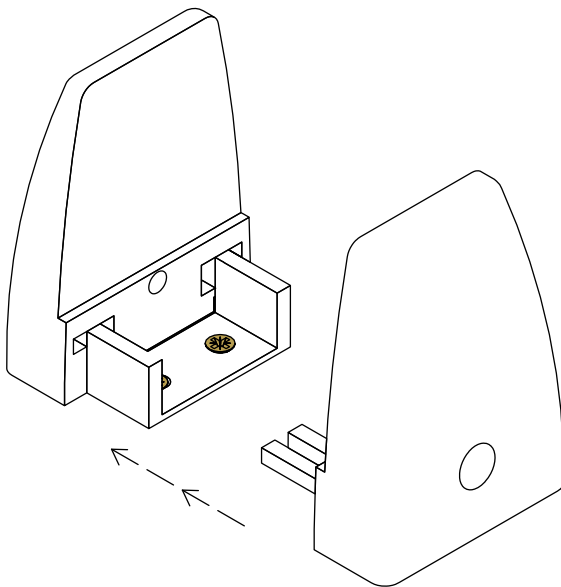

(Please note: You will require two clamp sets for all panels up to 48", all panels over 48" will require three clamp sets.)

2. Using the dimension diagram shown above as a reference, fix the first clamp section to the desk surface using two screws suitable for your desk material type and thickness..

3. Now, insert the second half of the clamp into the first section that is secured to the desk.

4. Place the Desk Divider into the clamps and tighten into place using the bolt provided.
