Install Guide

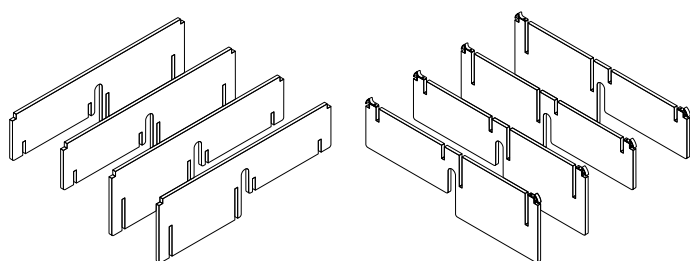

PixelGrid Ceiling Tile

Quiet by design

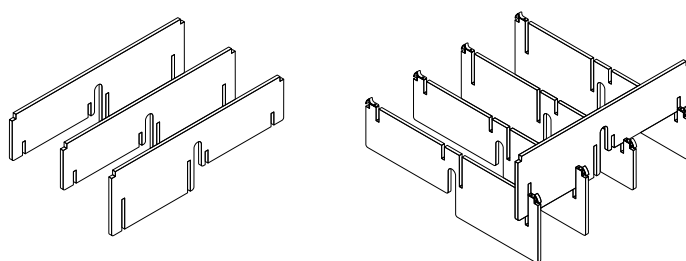

- Prior to installation, installers are advised to unpack and lay out panels to determine the most aesthetically pleasing arrangement of panels.

1. Locate and arrange the upper and lower parts of the PixelDrop Ceiling Tile as shown below.

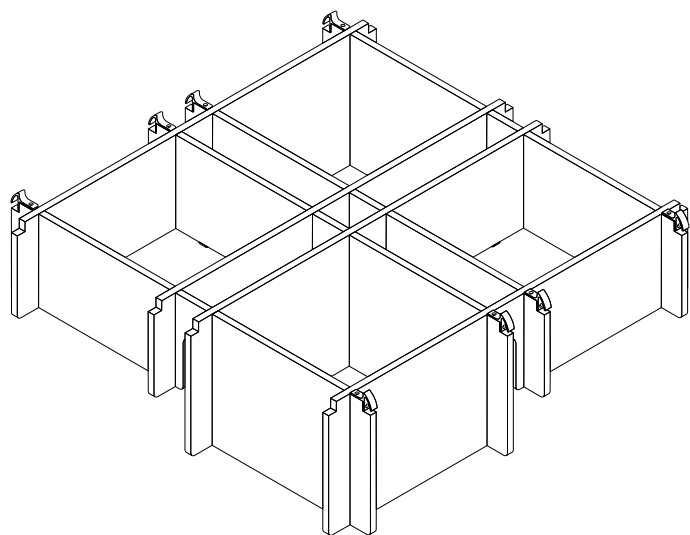

(Note; the lower parts will have hardware attached).

2. Begin inserting the upper baffle parts into the lower baffle parts by sliding the cut-out slots into each other. Push firmly to ensure a secure connection.

3. Repeat this process for the remaining 3 upper sections to complete the Ceiling Tile.

4. Align the tile with the underside of your T-Grid system, then push the tile into the grid to engage the plastic clips. Your tile is now installed.
